OUR CAPABILITIES

IT STRATEGY & CONSULTING

Our **thought leadership** helped to implement successful strategies for **large scale programs**. We continue to guide and transform our clients with **strategic solutions**.

TEST ENGINEERING

Our **Test-Driven Development** model will build quality into the development and eliminate the need for separate testing phases thus **saving cost and time** to **rapidly deploy** solutions into production.

On-shore, near-shore and off-shore capabilities.

SOFTWARE DELIVERY

Our **practical agile methodology** helped us to deliver quality solutions to our clients at **rapid speed**. **Openness and simplicity** in our thinking help **evolve ideas**.

CROWD SOURCED TESTING

Our CST model of testing will **reduce the burden of hiring and maintaining full time validation engineers** and make trusted crowd available to test on demand.

OUR DOMAINS AND EXPERTISE

25+ projects delivered, 7 projects with budgets of \$100M+

FINANCIAL SERVICES

Capital Markets modernization projects. Transformed **testing organizations**. **Implemented strategies**. Automated backend processes for a **large global bank**. Developed custom applications for **mobile** devices on different platforms. **Automated business processes** for an **investment bank**. Reduced overall implementation time by 20%.

HEALTHCARE & SOCIAL SERVICES

Health Care Information Technology and Project Management at **top 50** and **top 100** hospitals in the United States. Supervised the migration and testing of **Electronic Medical Records (EMR)** with measurable results and ROI. Implemented remote clock-in and tracking system for social service providers for children and seniors.

GEO SPATIAL

One stop solution for all GIS Services. Leading organizations that provide high quality **Outsourced GIS Services (LiDAR, Mobile LiDAR Mapping, Photogrammetry, Cartography, PLS CAD and BIM)**. Professional GIS services to clients and **governments around the world**.
